

GS-W1006

PARTS CHECK LIST

NO.	Name	QTE	Description	Size	Material	Remarks
1	MP139	2	MAIN POST(upper+lower)	Φ165.2 X L10000	Galvanized Steel	UV polyester powder coating
2	RC22	1 SET	MULTI COMPOUND ROPE	Ф22, Ф20	Nylon	
3	NCP150	1	PLASTIC POST CAP	Ф166 Х Н90	MC Nylon	
4	TB50	4 SET	TURN BUCKLE(GS-T82)	Ф50	Galvanized Steel	
5	ACS78	4	ANCHOR SHACKLE	M22	Galvanized Steel	
			BOLT,NUT			
7	ТВНТ22	8	H/T BOLTS	M22 X L160		turn buckle assembly
	TBNU22	8	NUTS	M22		
	TBWA22	8	WASHERS	M22		
	TBSW22	8	SPRING WASHERS	M22		
8	PCUB12	2 SET	U-BOLTS	M12	Stainless Steel	post cap assembly
			BASE			
9	MPP	1 SET	MAIN POST PLATE	500 X 500	Galvanized Steel	
10	L-B78	4	L-ANCHOR BOLTS	M22 X L500	Galvanized Steel	
	L-N78	8	NUTS	M22	Galvanized Steel	
	L-SW78	4	SPRING WASHERS	M22	Galvanized Steel	
	L-W78	4	WASHERS	M22	Galvanized Steel	
11	ACP	4	ANCHOR	2000 X 1100	Galvanized Steel	

SINGLE MAST NET CLIMBER INSTALLATION MANUAL

Safety Checklist after first assembly

- **■** Test intervals of Safety: 6 months
- Test Component and contents:
- 1. Removing the reticulated system:
- Check of removing condition each rope - Screwing the turn buckle and conversion the turnbuckle
- in anchors plate(see for this workstep turnbuckle assembly)
- 2. Abrasion condition of rope:
- Checking of all rope surface
- Strengthned of rope: Coating on the surface
- 3. Attachment condition of the anchors plate and turnbuckle
- 4. Screwing condition of all bolt
- 5. Galvanizing condition of the steel component:
- Protection of steel component from corrosion.

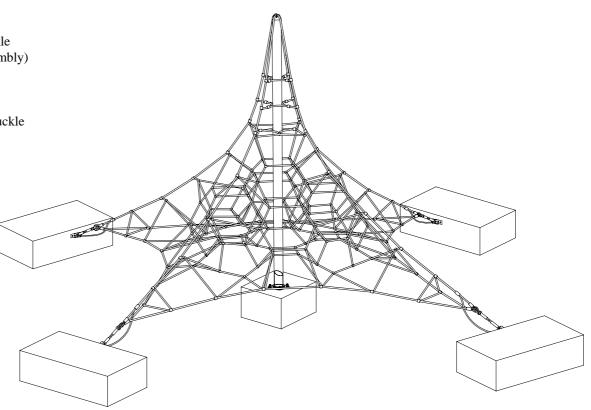

Measure

In case of the appearance the defect detail is repaired usually within 3 days after checking.

SINGLE MAST NET CLIMBER **INSTALLATION & MAINTENANCE INSTRUCTIONS**

Features

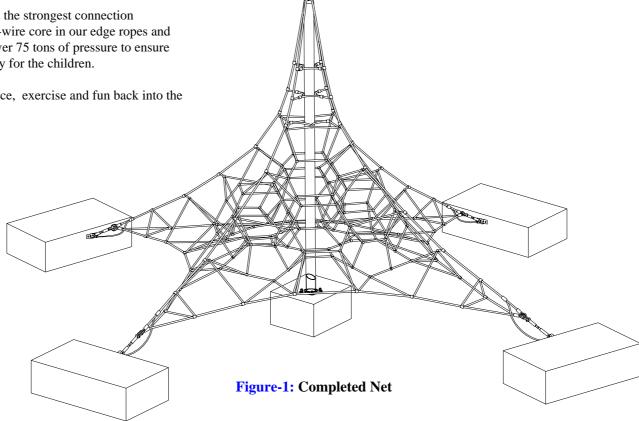

This series is a pyramid-style climbing structure made of steel-loaded Nylon cables and comes protected against UV.

GS Web uses the highest steel content and the strongest connection materials in the industry, including a steel-wire core in our edge ropes and connection points crushed in place with over 75 tons of pressure to ensure long life of the games and maximum safety for the children.

GS Web Nets help bring movement, balance, exercise and fun back into the playground.

Ages: 6 to 14 years Capacity: 157 children Size: L: 53' 4" / 16.26m W: 53' 4" / 16.26m

H: 31' 10" / 9.70m

SINGLE MAST NET CLIMBER Safety area and Fall Height zone

Safety area

The requirements for space and safety clearances are taken from BS-EN 1176-1/ ASTM-F1487/ CSA Z614 $\,$

The use zone for stationary play equipment shall extend no less than 72 in.(1830mm) from all sides of the play structure.

Fall Height: 2200mm (from surface) The Fall height on the extennal surface of a pyramid shaped space net is the highest point attainable on the edge of the structure where an unimpeded fall to the protective surface is possible. This height is based on the centre of gravity height of the maximum user. 11500 11500

Figure-2: Safety area

SINGLE MAST NET CLIMBER Safety area and Fall Height zone

Foundation

Please refer to GS-W1006 drawing for installation dimension

Level Line
Finished Grade

Wet concrete
(Optional)

P1 = Depth below Finished Grade (300mm)

P2 = Depth of concrete footings (1000mm & 800mm)

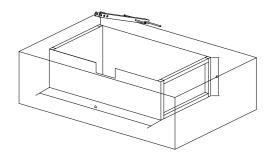

Figure-3: Excavate enough materials to allow for proper depth of concrete footings

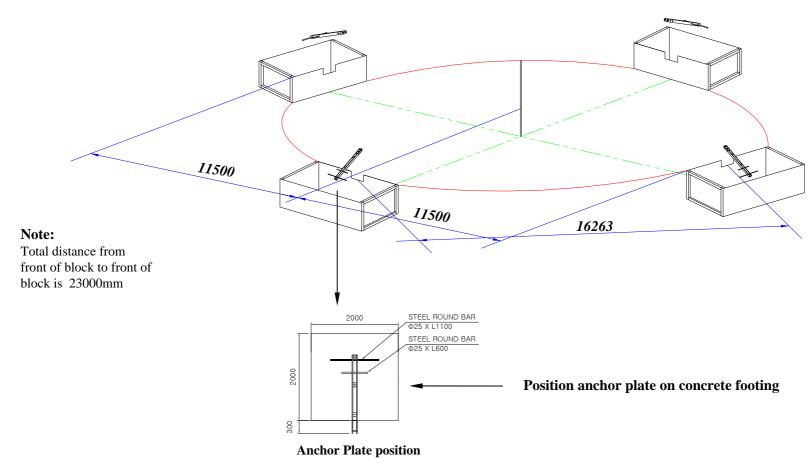

Also ensure that there is enough space to allow the frame to be positioned properly.

Anchor wood support frame to ground with pickets to prevent the frame from moving while concrete is poured and sets.

SINGLE MAST NET CLIMBER **Foundation Layout**

Figure -5: Footing and anchor plate layout

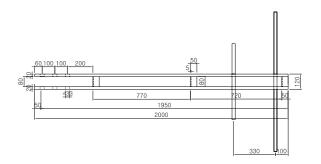

SINGLE MAST NET CLIMBER **Concrete Foundation**

Assemble wooden support frames *

- 4 frames (2000mm L x 2000mm W x 1000mm H)
- 1 frame (1500mm L x 1500mm W x 800mm H)

*Use ½" (min) plywood; not included in package

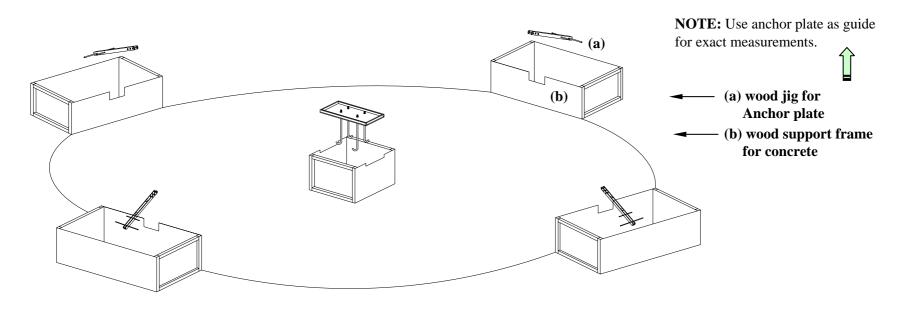

Figure-6: Wood support frame

SINGLE MAST NET CLIMBER **Concrete Footing**

[Concrete]

Pour concrete* into wooden support frame until flush to top edge Allow 3-5 days for concrete to cure before proceeding to next step.

[concrete footing work] *Concrete to be we concrete with minimum 25 MPa / 3500 PSI. Pour wet concrete in the wooden support frame

Figure-7: Concrete work

SINGLE MAST NET CLIMBER **Remove Wood Support Frame**

Remove wood support frame from dry concrete blocks

After concrete has cured enough, remove frames and replace soil around the footings to subgrade level

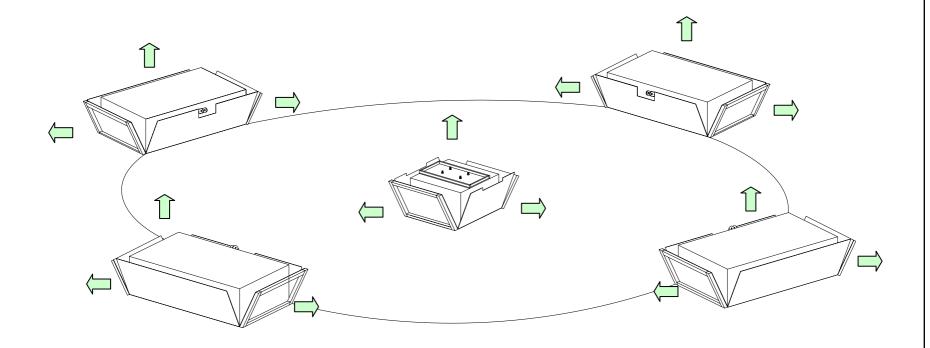

Figure-8: remove wood support frame

SINGLE MAST NET CLIMBER **Anchor Plate Assembly**

SINGLE MAST NET CLIMBER **Post Assembly**

Post Assembly

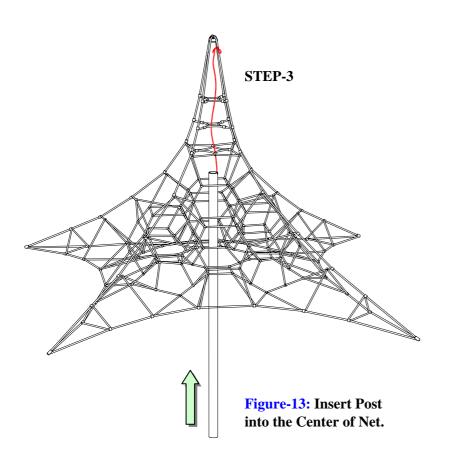

NOTE: Remove string prior to placing cap on post.

SINGLE MAST NET CLIMBER Joint Post and Cap with U-BoltAttaching Cap to Post

Place Cap on Post

Thread the mast through the net's center (per diagrams below, or following factory-installed guide string). Press the cap (already attached to the top of the net) into the mast's top end.

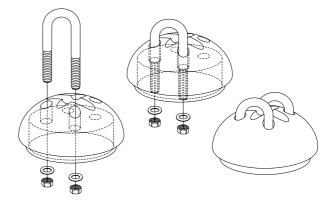

Figure-14: U-bolt assembly.

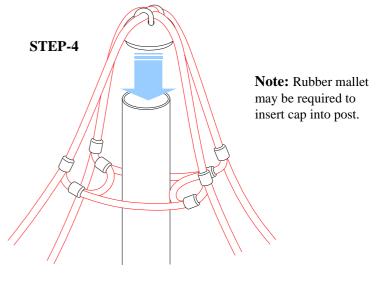

Figure-15: Post cap assembly.

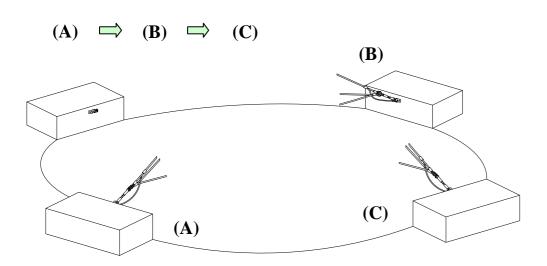

Safety Cable Attaching

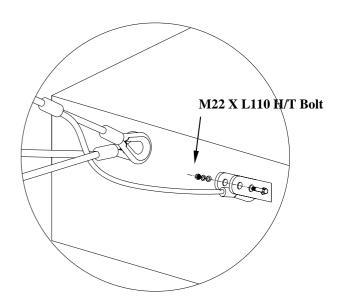

Attach safety cable to anchor plates (A) (B) (C) as shown in Figure 16.

After successfully preparing the net and mast assembly, attach safety cable with M22 X L110 H/T Bolt to Anchor plate as shown below

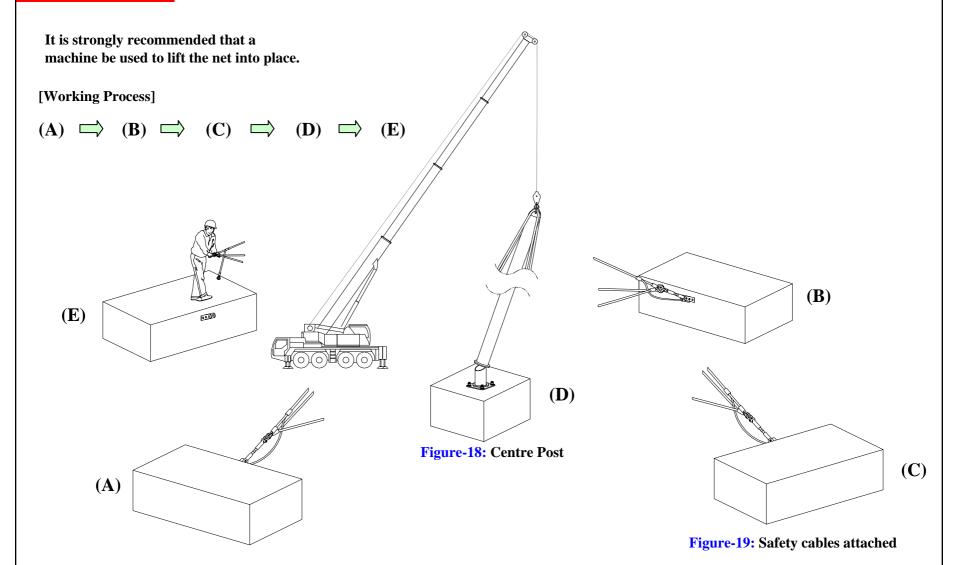

SINGLE MAST NET CLIMBER Standing the net

After standing up the Net, Attach remaining safety cable and Turnbuckles

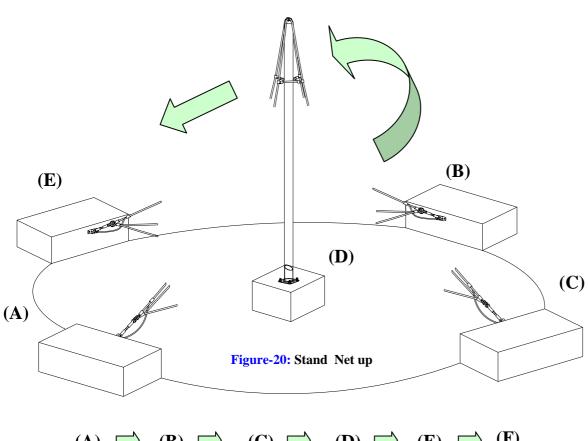

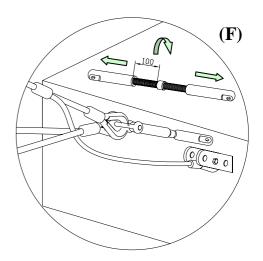

Figure-21: Loosen Turnbuckle: all the way (about 100mm), leaving only 4 or 5 threads attached

 $(\mathbf{D}) \implies$

SINGLE MAST NET CLIMBER Tensioning & Maintenance information

MODEL NO. GS-W1006

SINGLE MAST NET CLIMBER **PARTS LIST**

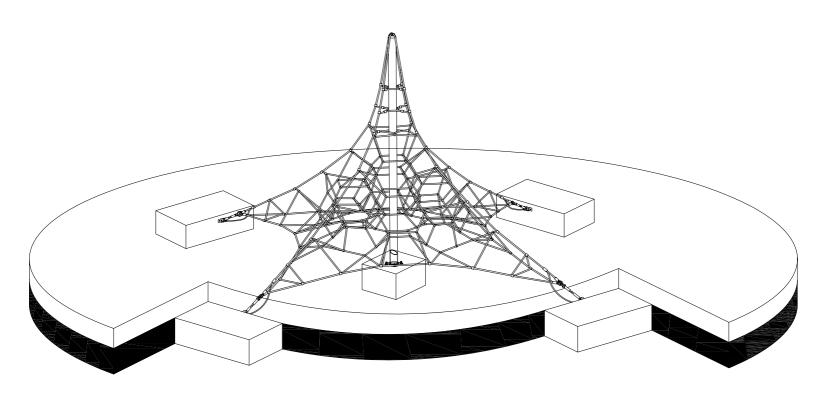

MODEL NO. **GS-W1006**

SINGLE MAST NET CLIMBER Safety area and Fall Height zone

A weekly check of the activity net is recommended to ensure that no acts of vandalism have damaged the rope. Periodic checks on tension will assist in the durability of the product.

SINGLE MAST NET CLIMBER Maintenance

A. General safety measures

On the playground there should be a sign(pictogram) giving the following information:

- a) general emergency telephone number;
- b) telephone number to contact maintenance personnel;
- c) name of the playground;
- d) address of playground; and
- e) other relevant local information, if applicable.

The entry, exit and emergency paths to and from a playground, intended for use by the public and emergency services, should be accessible and free of obstacles at all times.

NOTE Attention is drawn to local regulations.

B. Procedures

Defects that occur during operation and which put safety at risk should be corrected without delay. If this is not possible, the equipment should be secured against use e.g. by immobilization or removal.

There should be written operational procedures covering the measures to be taken in the event of accidents, fire and the like.

Until unsafe equipment is repaired and released for use, access by the public should be prevented. Information about accidents brought to the attention of the manager should be recorded on a form that includes the following details:

- a) date and tie of accident;
- b) age and sex of victim and clothing worn, Including footwear;
- c) equipment involved;
- d) number of children on site at the time of the accident;
- e) description of accident;
- f) injury sustained including part(s) of body affected;

GSWeb Playground Equipment

- g) action taken;
- h) witness statements;
- i) any subsequent equipment modification;
- j) weather conditions; and
- k) any other relevant information.

SINGLE MAST NET CLIMBER Maintenance

C. Routine maintenance

To reduce accidents, the owner or operator should ensure that an appropriate routine maintenance schedule is established, implemented and maintained. This should take into account local conditions and the manufacturer's instructions that can affect the necessary inspection frequency. The schedule should list the components to be maintained and should also give procedures for dealing with complaints and breakdowns. The routine maintenance of playground equipment and surfaces should consist of preventative measures to maintain their level of safety, performance and compliance with the relevant part(s) of EN 1176. Such measures should include:

- a) tightening of fastenings;
- b) re-painting and re-treatment of surfaces;
- c) maintenance of any impact attenuating surfaces;
- d) lubrication of bearings;
- e) markig of equipment to signify loose fill finished surface level;
- f) cleaning;
- g) removal of broken glass and other debris or contaminants;
- h) restoring loose fills to the correct level; and
- i)maintenance of free space areas.

D. Corrective maintenance

Corrective maintenance should include measures to correct defects, or th re-establish the necessary levels of safety of the playground equipment and surfaces. Such measures should include:

- a) replacement of fastenings;
- b) welding of welding repairs;
- c) replacement of worn or defective parts; and
- d) replacement of defective structural components.

E. Personal safety

Repairs during operation that could put the safety of maintenance personnel of the public at risk, should be avoided.

F. Equipment alterations

Alterations to parts of a piece of equipment or structure that could affect the essential safety of the equipment should only be carried out after consultation with the manufacturer or a compete person.
